HAZEL JOY CASILANG

Sta. Barbara, Pangasinan | hazeljoycslng@gmail.com | +639059013567 | linkedin.com/in/hazeljoycasilang

PROFESSIONAL SUMMARY

IT graduate with hands-on experience in data handling, system development and basic networking through internship and academic projects. Experienced in system development and testing, data organization, and project coordination. Served as a capstone project leader, managing the manuscript and coordinating group tasks. Detail-oriented, organized, and willing to learn and develop new technical skills.

EXPERIENCE

Data Entry / Administrative Assistant – Internship Jan 2026 – Jun 2026

DTI – NC Sta. Barbara, Pangasinan

- Processed business name applications and renewals using the DTI Business Name Registration System (BNRS) portal.
- Accurately encoded and updated client and business records in Microsoft Excel while maintaining high data accuracy and consistency.
- Prepared and consolidated monthly reports by verifying operational data for accuracy prior to submission.
- Maintained confidentiality of client information while processing business records and administrative documents.

PROJECTS

Online Public Access Catalogue for Philippine College of Science and Technology

Capstone Project Leader

- Led the development of the capstone research project, overseeing the writing, revision, and completion of documentation.
- Assigned tasks and coordinated team members to ensure timely progress and project completion.
- Organized and maintained system records to ensure accuracy and accessibility of project data.
- Assisted in testing system functionalities and accurately documented results.
- Collaborated effectively with team members to meet project objectives and deliver quality outputs.

Vault – Mobile Music App

- Developed a mobile music application using Flutter and Firebase with user authentication and music content management features. Implemented song browsing, lyrics display, and user account functionality.

Musify – Music Streaming Web System

- Developed a web-based music streaming system that allows users to browse, filter, and play music and video content. Built an admin panel for managing songs and categories, with access restrictions for private content.
